

WATER QUALITY AND CONSERVATION **(1984, R1992, R2000, R2001, R2007)**

Policy Statement

The American Society of Landscape Architects urges efficient use of available water supplies, equitable allocation of water resources, and the provision of safe drinking water. ASLA encourages land use practices that conserve and protect water resources and related ecosystems and eliminate all forms of water pollution. The Society urges multi-functional integration of water resource facilities with natural ecosystems and human communities.
